

# What version of the Macola software should I be using?

(Updated 10-20-09)

This document was prepared by Leahy Consulting as a reference for planning software upgrades. The most recent version of this guide can be downloaded from our web site at [www.LeahyConsulting.com](http://www.LeahyConsulting.com). If you are a pre-paid telephone support customer, your software upgrades are included at no cost.

Technical assistance and advice regarding software upgrades should be directed to Gary Fredensborg. Please call our support desk with questions about new features.

Leahy Consulting Support Desk (513) 723-8094

## Progression

How do I know what version I am currently using?

- From the main menu, go to > Help > Progression Information

The software release dates are:

- Version 7.6.400      May 2006
- Version 7.7              July 2008
- Version 7.7.200      August 2009 – this is the latest version

## ES

How do I know what version I am currently using?

- From the main menu, go to > Help > About > Software tab

The software release dates are:

- Release ES9.5.100      October 2008
- Release ES9.5.200      June 2009 – this is the latest version

## Crystal Reports

Any version of Crystal (V8.5, V10 and V11) will operate successfully when developing custom reports for any version of Macola.

Do I need to upgrade to Crystal version 11? Yes, if you are using Vista or Windows 7. Strongly recommended, if upgrading to the latest version of Macola. Yes, if modifications have been made to your Macola developed Integrated Crystal Reports (ICR).

## Event Manager

The software release dates are:

- Version 7.5              November 2008
- Version 7.8              October 2009 – this is the latest version

## Synergy, Interconnect and Integrator

ES users - When using the SynergyProductUpdater software, specify the version of Synergy that matches the version of your ES software.

Progression users - When you use the SynergyDownloader software, use the latest version of Synergy (version 9.5.200).

Integrator – When using the SynergyProductUpdater software, specify 'Synergy Tools' as the product line.
