

# PULSE ARCHIVE™

SPEEDS MACOLA BY ARCHIVING OLD DATA

## Speed up your Macola® processing by automatically moving seldom-used data into a separate database

**Non-destructive** • All records are preserved and easily accessible into the future

**Easy setup** • You choose what data is to remain in your active database

**Risk-free** • Eliminates the need to purge data that may be needed in future

**Designed for Macola®** • Works with Progression, ES and 10

**Easy installation and operation** • Unlimited training & support is included

### Do you wish your Macola® software ran faster?

Macola® is a high-performance system, but as you accumulate more and more data, it naturally takes longer and longer to sort through the data in day-to-day use. The result is a database that will take longer and longer to perform everyday tasks.

Has it been taking longer and longer to process your Macola® Progression, ES or Exact Macola® 10 transactions and print reports? Are you fearful of purging unneeded data because you will no longer have access to that data?

The PULSE Archive Software removes unneeded data from your Macola® database and archives it to another Macola® database in the event you need it into the future. Additionally, it re-indexes your Macola® data files for optimum performance.

The Result? Your Macola® database will be smaller and will run faster; AND you will always have access to your old data into the future, when needed.

## How does it work?

- First, run our Data File Analysis report to see the number of records (by year) in each data file currently being processed by your Macola® software.

Table Name	Number of records	1997	1998	1999	2000	2001	2002	2003	2004	2005	2006	2007	2008
IMORDHST	1,795,167						19,657	129,625	170,780	373,679	427,253	419,335	254,838
IMSHFIL	1,378,898					8	3,238	98,340	130,751	305,012	388,818	284,742	167,843
IMINVTRX	1,340,166												
GLTRXHST	478,315												
ARCOMDUE	379,483	20	484	1,717	3,244	19,865	31,933	33,377	28,901	54,299	74,181	90,603	40,857
POLINHST	319,426	503	2,439	3,638	2,972	4,951	13,653	23,479	25,201	46,915	80,890	69,129	45,656
SYTAXHST	227,262	802	3,756	6,820	13,566	12,946	17,863	17,509	15,183	27,928	38,327	45,270	27,291

- Next, establish a retention policy for each critical file. Simply set your preferences for the number of months of data you want to retain in our main database for each Macola® data file. The software will automatically archive older records to a separate database.

Importance	Archive Procedure	Macola Tables To Be Archived	Run Report	Number Of Months To Retain	Month To Run	Last Run Date
A	All - Master Files	APALTDAR APENRFIL APVENFIL_S...	✓	999	Runs Every Time Archive Process Is Executed	1/30/2014 2:50:50 PM
A	AP - Distribution to G/L	APDISFIL_SQL	✓	36	Runs Every Time Archive Process Is Executed	1/30/2014 2:50:50 PM
A	AP - Open Item File	APORNFIL_SQL APORPHST_SQL	✓	36	Runs Every Time Archive Process Is Executed	1/30/2014 2:50:50 PM
C	AP - Vendor Audit	APVENAUD	✓	9	Runs Every Time Archive Process Is Executed	1/30/2014 2:50:50 PM
B	AR - Commission Due	ARCOMDUE	✓	12	Runs Every Time Archive Process Is Executed	1/30/2014 2:50:50 PM

- Each month, run the Archive software. Per your retention policy, it removes data from your main Macola® database and appends it to your permanent Macola® archive database.
- Display the audit trail that documents the transfer of files from your active database to your archive database.
- Each month, run the Re-Index report to see the percent fragmentation for each data file. Run the Re-Index program for optimal Macola® performance.

Table Name	Fragmentation
OEORDHDR_SQL	71.43%
IMORDBLD_SQL	66.67%
SYACTFIL_SQL	60.00%
PPORDRST_SQL	60.00%
IMITMIDX_SQL	60.00%
IMINVLOC_SQL	60.00%

## What is included?

All of our software products include unlimited installation assistance, unlimited training, unlimited technical phone support and all software updates.
