

Purchase Order Generator Module

The PULSE DASHBOARD & REPORTING SOFTWARE is revolutionary software that lets you leverage your Macola® ERP software investment in a new way - with a real-time display of your vital business metrics, and detailed analysis with the click of a mouse. Modules include Executive, Customer Service/Shipping, Inventory, Purchasing, Production, Material Requirements, Financial Control and Designer.

PULSE Dashboard adds value to your Macola® ERP software investment

- Manage with real-time information, on-screen, company-wide, all the time
- All reports are in one place – no more looking for copies of paper reports
- Important metrics not found in your standard ERP software such as inventory aging
- One-click drill-down to view details & One-click report writer generates custom reports
- Installation & training in a day

Purchase Order Generator eliminates manual keying of purchase orders

- The most tedious, labor intensive and error-prone area of your ERP software has been eliminated.
- Use the P/O Generator to place orders based on reorder levels, for MRP Computer Planned Orders (CP orders); and/or for Shop Floor outside operations (ex. heat treating).
- P/O Generator suggests what items need to be purchased based on your unique rules.
- Click on the items you want to order and it automatically creates the purchase order.
- Use Event Manager to optionally automatically e-mail or fax purchase orders to your vendors.

In three easy steps, you can create your purchase orders with no manual keying:

Step 1: Select the buyer/planner code and/or location. Items to be purchased are grouped by vendor.

Create Purchase Order	Vendor Description
<input type="checkbox"/> Create PO	00000000300 - ATLANTA PACKAGING
<input type="checkbox"/> Create PO	00000000600 - CINCINNATI CLEANING
<input type="checkbox"/> Create PO	00000000700 - CHICAGO BOX COMPANY
<input type="checkbox"/> Create PO	00000002600 - BEARING SUPPLY
<input type="checkbox"/> Create PO	00000003000 - CHICAGO UNION SUPPLY

We tailor the software to follow your unique business rules

Included in the software are quick and convenient set-up options to customize the software to meet your unique business rules, such as:

- When do I select an item to be reordered (ex. use the reorder level or some other formula)?
- What locations need to be included or excluded?
- How to I prevent ordering something if I have an excess quantity at another location?
- What is my company's definition of 'Recommended Order Quantity'?
- Do I want to incorporate my 'Order Up-To Level' and 'Order Multiple' quantities?
- What P/O date do I want to use?
