

Overview of PULSE for Improved Inventory Management

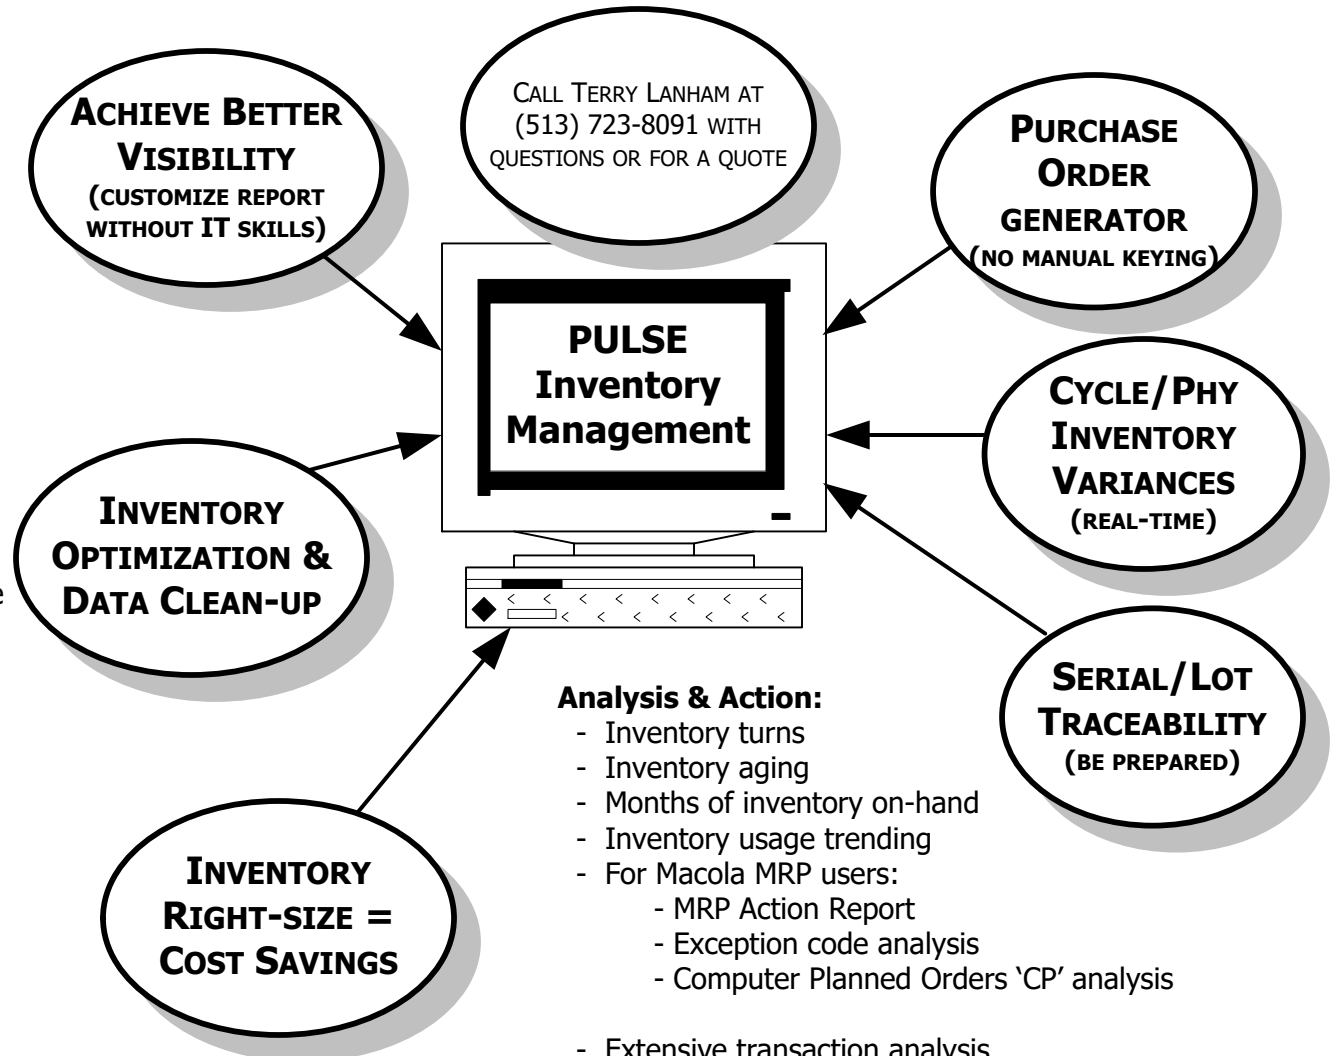

PULSE INVENTORY PRO
OPTIMIZES QUANTITIES / AUTOMATIC REORDERING

Better Visibility:

- Detailed item analysis
 - On-hand, on-order, allocated
 - Inventory turns
 - Obsolete items
- Shortages over next X days
- Easy to read stock status reports
 - by location/item/bin/serial/lot
- Bill of material & where-used
- Use PULSE MRP or Macola MRP
- Easily modify screens w/ no IT knowledge

Optimization & Data Clean-up:

- Pinpoint:
 - data integrity errors
 - data exceptions
- Develop inventory plan for every part
- On-demand re-calculating:
 - ABC class codes
 - min/max/safety stock levels
 - vendor lead time from history
- Daily re-calculating:
 - months of inventory on-hand
 - inventory 3, 6, 12 month usage trends
 - inventory turns
 - inventory aging

Analysis & Action:

- Inventory turns
- Inventory aging
- Months of inventory on-hand
- Inventory usage trending
- For Macola MRP users:
 - MRP Action Report
 - Exception code analysis
 - Computer Planned Orders 'CP' analysis
- Extensive transaction analysis
- Extensive serial/Lot traceability
- Real-time cycle/physical inventory variances
- Auto create purchase orders (no manual keying)
 - reorder levels
 - Macola MRP computer planned orders.
